RISKS TO INVESTORS

Summary description of key risk factors based on materiality:

- We do not have our own manufacturing facility for pharmaceutical products and we have to rely on third parties for contract manufacturing of the products sold by our Company.
- We are required to obtain, renew or maintain certain material statutory and regulatory permits and approvals required to operate our business, and if we fail to do so in a timely manner or at all, we may be unable to operate our business and our results of operations may be adversely affected.
- We derive a significant part of our revenue from few customers. If one or more of such customers choose not to source their requirements from us or to terminate our contracts or purchase orders, our business, cash flows, financial condition and results of operations may be adversely affected.
- If we are unable to protect our intellectual property rights, our business, results of operations and financial condition may be adversely affected. Further, if our products were found to be infringing on the intellectual property rights of a third-party, we could be required to cease selling the infringing products, causing us to lose future sales revenue from such products and face substantial liabilities for infringement of intellectual property rights.
- Our Company may be exposed to product liability and other claims arising from defective medicines manufactured by third-party Contract Manufacturers, despite having manufacturing agreements in place, as indemnity terms are not pre-determined.

Revenue from operations is calculated as the sum of revenue from sale.

- Total income is calculated as the sum of revenue from operations and other income for the period/year.
- Operating EBITDA refers to earnings before interest, taxes, depreciation, amortisation, gain or loss from discontinued operations and exceptional items.

Operating EBITDA Margin refers to EBITDA during a given period as a percentage of Total income during that period.

Profit / (loss) for the period/year is calculated as Total Income less Total Expenses less Total Tax expenses for the period/year.

- " Current Ratio is a liquidity ratio that measures our ability to pay short-term obligations (those which are due within one year) and is calculated by dividing the current assets by
- current liabilities. Debt to equity ratio is calculated by dividing the debt (i.e., borrowings (current and non-current) and current maturities of long-term-borrowings) by total equity (which includes issued capital and all other equity reserves). (8) Debt Service Coverage Ratio is calculated by dividing the sum of Profit after Tax and interest amount by sum of the repayment of loan and Interest.
- RoCE (Return on Capital Employed) (%) is calculated as profit before tax plus finance costs divided by total equity, Reserves & Surplus and non current liabilities.
- "Net Profit Ratio/Margin quantifies our efficiency in generating profits from our revenue and is calculated by dividing our net profit after taxes by our total revenue. "Return on equity (RoE) is equal to profit for the year divided by the total equity and reserve and surplus during that period and is expressed as a percentage
